

WAC 173-518-050 Closures. Surface water: Ecology determines that, based on recommendations in the watershed plan, historical and current low stream flows, and the need to protect existing water rights, water is not reliably available for new consumptive uses from the streams and tributaries in the Dungeness River watershed listed in Table III, with the exception of certain times of year in the Dungeness mainstem. Therefore, Bagley, Bell, Cassalery, Gierin, Matriotti, McDonald, Meadowbrook, and Siebert creeks, and unnamed tributaries to the Dungeness River, are closed year round. The Dungeness River mainstem is closed from July 15 until November 15 each year. Table III shows the closure periods and affected reaches. Exceptions to the surface water closures are provided in WAC 173-518-070, 173-518-080, and 173-518-085.
