- WAC 296-800-16055 Make sure your employees use appropriate head protection. (1) You must make sure employees wear appropriate protective helmets.
- (a) Where employees are exposed to hazards that could cause a head injury. Examples of this type of hazard include:
  - (i) Flying or propelled objects.
  - (ii) Falling objects or materials.
- (b) Where employees are working around or under scaffolds or other overhead structures.
- (2) Head protection must comply with any of the following consensus standards:
- (a) American National Standards Institute (ANSI) Z89.1-2009, "American National Standard for Industrial Head Protection";
- (b) American National Standards Institute (ANSI) Z89.1-2003, "American National Standard for Industrial Head Protection";
- (c) American National Standards Institute (ANSI) Z89.1-1997, "American National Standard for Personnel Protection—Protective Headwear for Industrial Workers—Requirements."
- (d) You may use protective helmets that do not meet these ANSI standards if you can demonstrate that they are equally effective as those constructed in accordance with the above ANSIs.
- (3) You must make sure employees working near exposed electrical conductors that could contact their head wear a protective helmet designed (that meet the above ANSI standards) to reduce electrical shock hazard.

Caps with metal buttons or metal visors must **not** be worn around electrical hazards.

- (4) You must make sure employees working around machinery or in locations that present a hair-catching or fire hazard wear caps or head coverings that completely cover their hair.
- (a) Employees must wear a hair net that controls all loose ends when:
- (i) Hair is as long as the radius of pressure rolls with exposed in-running nip points.
- (ii) Hair is twice as long as the circumference of exposed revolving shafts or tools in fixed machines.
  - (b) Employees must wear a hair covering of solid material when:

The employee is exposed to an ignition source and may run into an area containing category 1 or 2 flammable liquids, such as ether, benzene, or category 3 flammable liquids with a flashpoint below  $100^{\circ}$ F (37.8°C), or combustible atmospheres if their hair is on fire.
