WAC 296-842-17015 Inspect and repair respirators. (1) Conduct respirator inspections as often as specified in Table 9.

- (2) Make sure respirator inspections cover **all** of the following:
- (a) Respirator function;
- (b) Tightness of connections;
- (c) The condition of the facepiece, head straps, valves, connecting tubes, and cartridge, canisters or filters;
 - (d) Pliability and deterioration of elastomeric parts;
 - (e) Maintenance of air or oxygen cylinders;
- (f) Making sure SCBA air cylinders are at ninety percent of the manufacturer's recommended pressure level;
- (q) Proper functioning of SCBA regulators when air-flow is activated; and
- (h) Proper functioning of SCBA low-pressure warning devices when activated.
- (3) Certify inspections for emergency respirators by documenting the following:
 - (a) Inspection date;
- (b) Serial number of each respirator or other identifying information;
 - (c) Inspector's name or signature;
 - (d) Inspection findings; and
 - (e) Required action, if problems are found.

Note:

When documenting inspections you may either:

- Provide the information on a tag or label and attach it to the respirator compartment; or
 Include the information in an inspection report stored in paper or electronic files accessible to employees.
- Repair or replace any respirator that is not functioning properly **before** the employee returns to a situation where respirators are required.
- If respirators fail inspection or are not functioning properly during use due to problems such as leakage, vapor or gas breakthrough, or increased breathing resistance, ALL of the following apply:
- (a) Do NOT permit such respirators to be used until properly repaired or adjusted;
 - (b) Use only NIOSH-certified parts;
- (c) Make sure repairs and adjustments are made by appropriately trained individuals;

Use the manufacturer or a technician trained by the manufacturer to repair or adjust reducing and admission valves, regulators, and warning devices on SCBAs or air-line respirators.

- (d) Follow the manufacturer's recommendations and specifications for the type and extent of repairs.
 - (5) Use Table 9 to determine how often to inspect respirators.

Table 9 Required Frequencies for Respirator Inspections

If the respirator is	Then inspect
A SCBA in any use	Before each use; and
	During cleaning; or
	Monthly if NOT used
Used for nonemergencies, including day-to-day or infrequent use	• Inspect before each use; and
	During cleaning
Used only for emergencies	• Check for proper function before and after each use; and

If the respirator is	Then inspect
	• Inspect at least monthly as instructed by the manufacturer
Used for escape-only purposes	Before carrying into a work place for use
