WAC 296-842-22020 Follow procedures established for seal checking respirators. Make sure employees perform a user seal check as outlined in Table 21 each time the respirator is worn, to make sure the seal is adequate.

IMPORTANT:

1. User seal checks are NOT a substitute for fit tests. See WAC 296-842-22010 for fit test procedures.

2. You may use a seal check procedure recommended by the respirator manufacturer INSTEAD of the procedure outlined in Table 21 if you can demonstrate the procedure is based on a scientific study that, for example, demonstrates the procedure effectively identifies respirators that fit poorly when put on or adjusted.

Table 21	
User Seal Check Procedu	re
Important information for employees:	
You need to conduct a seal check each your respirator on BEFORE you enter t use area. The purpose of a seal check i your respirator (which has been previc by your employer) is properly position face to prevent leakage during use and functional problems	he respirator is to make sure ously fit tested ned on your
The procedure below has two parts; a pressure check and a negative pressure must complete both parts each time take a few seconds to perform, once y	check. You It should only
If you cannot pass both parts, your res functioning properly, see your supervi instruction.	pirator is NOT sor for further
Positive pressure check:	
1. Remove exhalation valve cover, if remo	ovable.
2. Cover the exhalation valve completely of your hand WHILE exhaling gently to in facepiece slightly.	with the palm flate the
3. The respirator facepiece should remain (indicating a build-up of positive pressure outward leakage).	inflated and NO
a. If you detect NO leakage, replace the valve cover (if removed), and proceed negative pressure check	
b. If you detect evidence of leakage, re respirator (after removing and inspect the positive pressure check again.	
Negative pressure check:	
4. Completely cover the inhalation openin cartridges or canister with the palm(s) of y WHILE inhaling gently to collapse the fact	your hands
If you cannot use the palm(s) of your leffectively cover the inhalation openir cartridges or canisters, you may use:	hands to ngs on
Filter seal(s) (if available)	
OR	
Thin rubber gloves.	
5. Once the facepiece is collapsed, hold ye 10 seconds WHILE keeping the inhalation covered.	our breath for openings

User Seal Check Procedure

6. The facepiece should remain slightly collapsed (indicating negative pressure and NO inward leakage).

a. If you detect **NO** evidence of leakage, the tightness of the facepiece is considered adequate, the procedure is completed, and you may now use the respirator

b. If you detect leakage, reposition the respirator (after removing and inspecting it) and repeat **BOTH** the positive and negative fit checks.
