

WAC 332-20-020 Grazing management. Management of state lands for grazing purposes will be based upon that grazing capacity which permits maximum forage utilization and seeks to maintain or improve to "good" condition range as defined by the soil conservation service. Grazing capacity will be established after consideration of historical stocking rates, forage utilization, range condition, and trend. Pertinent range research findings of Washington State University and the advice of the soil conservation service will be considered in the management of the grazing resources.

[Statutory Authority: RCW 79.28.050 and 79.28.040. WSR 83-21-018 (Order 402), § 332-20-020, filed 10/7/83; Rules (part), filed 12/3/63; Permit Range Regulations (part), effective 6/1/59.]
