

WAC 388-101D-0355 What must a client record contain if the client is prescribed a psychotropic medication? (1) If the client is prescribed psychotropic medication, the client's record must contain:

- (a) The date the client met with the prescriber;
- (b) Whether the provider was present when the prescriber examined the client;
- (c) Any medical or behavioral information the provider conveyed to the prescriber;
- (d) Any instructions the provider received from the prescriber;
- (e) The drug information sheet obtained from the prescriber or dispensing pharmacy for the psychotropic medication prescribed;
- (f) The date the provider sent the client's legal representative a copy of the psychotropic drug information sheet, if requested; and
- (g) Any documentation required under WAC 388-101D-0340.

(2) If the provider does not attend the appointment, the provider must document in the client record whether the client attended the appointment independently or with a third party.

(3) The provider must report to the prescriber if:

- (a) The medication does not appear to have the prescriber's intended effects; or
- (b) Any changes in the client's behavior or health might be an adverse side effect of the medication.
